2.	particularly cement was daily brought on trains of about 40 axles to
	in Bremenhain near Rothenburg for the construction of an airfield. Source also heard rumors to this effect from workers in Weisswasser who were employed for construction work. 25X1C source learned from a worker that construction material, particularly cement was daily brought on trains of about 40 axles to Bremenhain via Horka railroad station. Allegedly, an airfield was to be constructed in Bremenhain near Rothenburg. , a painter from Noes, formerly called Bleichenau, said that an airfield was under construction near Rothenburg. The informant stated that temporary buildings had been erected in a wood east of Noes, that the construction site was restricted and that construction
2. 25X1X 3.	in Bremenhain near Rothenburg for the construction of an airfield. Source also heard rumors to this effect from workers in Weisswasser who were employed for construction work. 25×1C source learned from a worker that construction material, particularly cement was daily brought on trains of about 40 axles to Bremenhain via Horka railroad station. 2. 25X1X 3. 25X1C	in Bremenhain near Rothenburg for the construction of an airfield. Source also heard rumors to this effect from workers in Weisswasser who were employed for construction work. 25X1C source learned from a worker that construction material, particularly cement was daily brought on trains of about 40 axles to Bremenhain via Horka railroad station. Allegedly, an airfield was to be constructed in Bremenhain near Rothenburg. , a painter from Noes, formerly called Bleichenau, said that an airfield was under construction near Rothenburg. The informant stated that temporary buildings had been erected in a wood east of Noes, that the construction site was restricted and that construction work was kept secret. Comment. These statements confirm the assumption that the former improvised airfield near Bremenhain is being improved. The pin-point location and dimensions of the field are not yet known. Horka railroad station is the intersection between the Spremberg-Goerlitz and Bunzlau-Hoyerswerda railroad lines. For location, see Map GSGS 4414,
